12 WEEK TOPICAL BREAKDOWN - P.3 MATHEMATICS TERM II

WEEK	PERIOD	TOPIC	SuB-TOPIC	CONTENT	REFERENCE ASBAT MTC BK3
1	1	NUMBER PATTERNS AND SEQUENCE	Types of numbers – whole numbers and counting numbers	• A number is the idea of knowing how many. • A pattern is repetition of events in a particular order. • Patterns form a sequence. • Whole numbers – numbers that are not fractions. • The first whole number is zero (0). • Counting numbers (natural numbers) – numbers used to count objects. • The first counting number is one (1). • Their sequence has a pattern of +1 in ascending order and –1 in descending order.	pp. 92-93
	2		Sequences of whole numbers	• Identify and complete sequences of whole numbers. • Example: 0,1,2,3,4,… • Fill in missing numbers in whole number sequences.	p. 93
	3		Sequences of counting numbers	• Identify and complete sequences of counting numbers. • Example: 1,2,3,4,5,… • Fill in missing numbers in counting number sequences.	p. 93
	4		Even numbers	• Even numbers – numbers exactly divisible by 2. • Examples: 0,2,4,6,8,… • Pattern: +2 in ascending order, –2 in descending order. • Complete sequences of even numbers.	pp. 94-95
	5		Odd numbers	• Odd numbers – numbers not exactly	pp. 94-95

				divisible by 2. • Examples: 1,3,5,7,9,… • Pattern: +2 in ascending order, –2 in descending order. • Complete sequences of odd numbers.	
2	1	NUMBER PATTERNS AND SEQUENCE	Finding missing numbers – addition pattern	• Identify the rule (add a constant). • Example: 1,4,7,10,… (add 3). • Find next or missing numbers.	pp. 95-96
	2		Finding missing numbers – subtraction pattern	• Identify the rule (subtract a constant). • Example: 65,55,50,45,… (subtract 5). • Find next or missing numbers.	pp. 95-96
	3		Finding missing numbers – mixed patterns	• Identify rules involving multiplication or combination of operations. • Find missing numbers in more complex sequences.	pp. 95-96
	4		Multiples of numbers (less than, between)	• A multiple is a product of two or more numbers. • List multiples of a number less than a given value. • Example: multiples of 2 less than 10 → {2,4,6,8}.	pp. 96-97
	5		Multiples of numbers (from … to)	• List multiples of a number between two values. • Example: multiples of 3 from 3 to 15. • List first few multiples of a number.	pp. 96-97
3	1	NUMBER PATTERNS AND SEQUENCE	Factors of numbers	• A factor is a number that divides another number exactly. • Find all factors of a number. • Example: factors of 8 are {1,2,4,8}. • Example: factors of 4 are {1,2,4}.	pp. 97-98
	2		Multiplying in twos, threes, fours, fives and tens (repeated addition)	• Multiplication as repeated addition. • Count in groups: 1 two = 2, 2 twos = 4, 3 threes = 9, etc.	pp. 98-99

				• Express repeated addition as multiplication.	
	3	COMPLETING DIAGRAMS BY FILLING IN MISSING NUMBERS	Finding missing numbers – addition/subtraction diagrams	• Use addition or subtraction to find missing values in triangle or circle diagrams where the centre is the sum. • Identify the relationship.	pp. 99-102
	4		Finding missing numbers – multiplication/division diagrams	• Use multiplication or division to find missing values where the centre is the product. • Apply inverse operations.	pp. 99-102
	5		Using inverse operations to fill missing numbers	• Addition and subtraction are inverse operations. • Multiplication and division are inverse operations. • Find missing numbers in blank spaces using given relationships.	pp. 99-102
4	1	MAGIC SQUARE	Understanding magic squares	• A magic square is a grid where the sum in each row, column, and main diagonal is the same. • That common sum is the magic sum. • Find the magic sum by adding any full row or column.	pp. 103-105
	2		Finding missing numbers in magic squares (one missing)	• Given a 3×3 magic square with one number missing, use the magic sum to find it. • Example: a + 4 + 8 = magic sum → solve for a.	pp. 103-105
	3		Finding missing numbers in magic squares (several missing)	• Given a 3×3 magic square with several missing numbers, use row, column, and diagonal sums to find all unknowns. • Set up and solve simple equations.	pp. 103-105
	4	FRACTIONS	Introducing fractions – parts of a whole	• A fraction is part of a whole. • Identify the shaded part of a shape as a fraction. • Identify the unshaded part of a shape as a fraction.	pp. 106-108
	5		Writing fractions for shaded and unshaded parts	• Write the fraction of a shape that is shaded.	pp. 106-108

				• Write the fraction of a shape that is not shaded. • Use diagrams of circles, rectangles, and squares.	
5	1	FRACTIONS	Shading given fractions (proper fractions)	• Shade a given fraction of a diagram (e.g., shade ½, ⅓, ¾). • Ensure the shape is divided into equal parts.	pp. 108-109
	2		Shading given fractions (drawing shapes)	• Draw shapes (rectangles, circles) and shade the required fraction. • Example: draw a rectangle and shade 3/5.	pp. 108-109
	3		Comparing fractions using diagrams	• Use diagrams to compare fractions visually. • Identify which fraction is larger by comparing shaded areas. • Example: ½ > ¼, ¼ < ⅓.	pp. 110-111
	4		Comparing fractions with the same denominator	• When denominators are the same, compare the numerators. • The fraction with the larger numerator is greater. • Use symbols >, <, or =. • Example: ⅔ > ⅓, ⅘ > ⅖.	pp. 110-111
	5		Adding fractions using diagrams (same denominator)	• Use shaded diagrams to add fractions with the same denominator. • Add the numerators; keep the denominator. • Example: ½ + ½ = 1; ¼ + 2/4 = ¾.	pp. 112-114
6	1	FRACTIONS	Addition of fractions (same denominator) – numerical	• Add proper fractions with like denominators. • Add numerators, keep denominator. • Simplify where possible (e.g., 2/4 = ½). • Example: 1/8 + 3/8 + 1/8 = 5/8.	pp. 114-115
	2		Word problems – addition of fractions (same denominator)	• Solve real-life problems involving addition of fractions with the same denominator. • Example: A pupil read 1/8 of a book on Monday and 3/8 on Tuesday.	p. 115

				What fraction did he read altogether?	
	3		Subtraction of fractions using diagrams (same denominator)	• Use shaded diagrams to subtract fractions with the same denominator. • Subtract numerators; keep the denominator. • Example: ⅔ – ⅓ = ⅓; 5/10 – 2/10 = 3/10.	pp. 116-117
	4		Subtraction of fractions (same denominator) – numerical	• Subtract proper fractions with like denominators. • Subtract numerators, keep denominator. • Simplify answers. • Example: 7/12 – 4/12 = 3/12 = ¼.	pp. 117-118
	5		Word problems – subtraction of fractions (same denominator)	• Solve word problems using subtraction of fractions (difference, remain, left). • Example: A boy had 5/6 of a cake. He ate 2/6. What fraction remained?	p. 118
7	1	FRACTIONS	Fractions of a whole (fraction of a number)	• The word "of" means multiplication. • Find ½ of 6 = ½ × 6 = 3. • Find ⅓ of 12 = 4. • Multiply numerator by the number, then divide by denominator.	p. 119
	2	GRAPHS AND INTERPRETATION OF INFORMATION	Pictographs – interpreting the scale	• A pictograph uses pictures to represent data. • Determine the value of each picture (the scale). • Example: one picture = 4 chairs; two pictures = 8 chairs.	pp. 120-121
	3		Pictographs – finding number of pictures from total	• Given a total quantity and a scale, find how many pictures represent that total. • Divide the total by the scale. • Example: 4 chairs per picture, how many pictures for 16 chairs? 4 pictures.	pp. 121-122
	4		Interpreting pictographs – answering questions (how many, how many more)	• Read a pictograph (e.g., number of balls given to clubs). • Answer: how many for a specific club, how many more, total, difference.	pp. 121-122

	5		Drawing pictographs from data tables	• Given a data table (e.g., number of textbooks per class), draw a pictograph. • Choose an appropriate scale (e.g., 1 picture = 2 books). • Label the key.	pp. 122-123
8	1	GRAPHS AND INTERPRETATION OF INFORMATION	Bar graphs – reading the vertical scale	• A bar graph uses columns or blocks to represent quantity. • Read the vertical scale to find the value of each bar. • Identify the height of each bar.	pp. 123-124
	2		Bar graphs – comparing and answering questions	• Compare heights of bars to find which is largest, smallest, or equal. • Find totals and differences between bars. • Answer questions like: how many, how many more, total.	pp. 123-124
	3	GEOMETRY	Polygons – triangles and quadrilaterals	• A polygon is a closed figure with straight sides. • Triangle: a polygon with 3 sides. • Quadrilaterals: polygons with 4 sides. • Identify and name triangles and quadrilaterals.	pp. 125-126
	4		Properties of squares, rectangles, rhombuses	• Square: 4 equal sides, 4 right angles. • Rectangle: opposite sides equal, 4 right angles. • Rhombus: all sides equal, opposite sides parallel. • Identify each shape.	pp. 125-126
	5		Properties of parallelograms, trapeziums, kites	• Parallelogram: opposite sides equal and parallel. • Trapezium: one pair of parallel sides. • Kite: two pairs of adjacent equal sides. • Identify and draw each shape.	pp. 125-126
9	1	GEOMETRY	Solid shapes – cube and cuboid	• Cube: 6 square faces, 8 vertices, 12 edges. • Cuboid: 6 rectangular faces, 8 vertices, 12 edges. • Identify faces, vertices, edges.	pp. 126-127

	2		Solid shapes – cone, cylinder, triangular pyramid	• Cone: 1 circular base, 1 curved face, 1 vertex, 1 edge. • Cylinder: 2 circular faces, 1 curved face, 0 vertices, 2 edges. • Triangular pyramid: 4 triangular faces, 4 vertices, 6 edges.	pp. 126-127
	3		Counting shapes in composite figures	• Count the number of triangles in a given diagram. • Count the number of squares. • Count the number of circles. • Count the number of rectangles. • Identify overlapping or embedded shapes.	pp. 128-129
	4	TIME	Days of the week	• Days: Monday, Tuesday, Wednesday, Thursday, Friday, Saturday, Sunday. • Identify the order of days. • Answer questions: which day comes after…, before…	p. 130
	5		Changing days to weeks and weeks to days	• 1 week = 7 days. • Change days to weeks: divide by 7. • Change weeks to days: multiply by 7. • Example: 28 days = 4 weeks; 4 weeks = 28 days.	pp. 131-132
10	1	TIME	Addition and subtraction of days and weeks	• Add weeks and days: 7 days = 1 week (carry over). • Subtract with borrowing: 1 week = 7 days. • Solve word problems.	pp. 132-133
	2		Months of the year and number of days	• There are 12 months in a year. • Know the number of days in each month (Jan 31, Feb 28/29, Mar 31, Apr 30, May 31, Jun 30, Jul 31, Aug 31, Sep 30, Oct 31, Nov 30, Dec 31).	pp. 134-135
	3		Changing years to months and months to years	• 1 year = 12 months. • Change years to months: multiply by 12.	p. 135

				• Change months to years: divide by 12. • Example: 2 years = 24 months; 48 months = 4 years.	
	4		Addition and subtraction of years and months	• Add years and months: 12 months = 1 year (carry over). • Subtract with borrowing: 1 year = 12 months. • Solve word problems.	pp. 135-137
	5		Hours and minutes – conversion	• 1 hour = 60 minutes. • Change hours to minutes: multiply by 60. • Change minutes to hours: divide by 60. • Example: 2 hours = 120 minutes; 180 minutes = 3 hours.	p. 138
11	1	TIME	Addition and subtraction of hours and minutes	• Add hours and minutes: 60 minutes = 1 hour (carry over). • Subtract with borrowing: 1 hour = 60 minutes. • Solve word problems.	pp. 138-139
	2		Telling time – reading clock faces (o'clock)	• Read time to the hour (o'clock). • Identify the hour hand (short) and minute hand (long). • Draw clock faces showing given times (e.g., 4 o'clock).	pp. 140-141
	3		Telling time – past (quarter past, half past)	• When the minute hand is on the right half (1-30 minutes), use "past". • Quarter past = 15 minutes past (minute hand at 3). • Half past = 30 minutes past (minute hand at 6). • Identify and write time using "past".	pp. 142-145
	4		Telling time – to (quarter to)	• When the minute hand is on the left half (31-59 minutes), use "to". • Quarter to = 15 minutes to the next hour (minute hand at 9). • Express time using "to". • Draw clock faces for given "to" times.	pp. 146-148

	5		Using a calendar	• Read a calendar (month page). • Find the number of days in the month. • Find the starting day and ending day of the month. • Determine the date for a given day of the week. • Count Sundays, Mondays, etc.	p. 149
12	1	REVISION	End of Term II revision	• Comprehensive revision of all Term II topics (number patterns, completing diagrams, magic square, fractions, graphs, geometry, time).	pp. 92-150
	2	REVISION	End of Term II revision	• Comprehensive revision of all Term II topics.	pp. 92-150
	3	REVISION	End of Term II revision	• Comprehensive revision of all Term II topics.	pp. 92-150
	4	REVISION	End of Term II revision	• Comprehensive revision of all Term II topics.	pp. 92-150
	5	REVISION	End of Term II revision	• Comprehensive revision of all Term II topics.	pp. 92-150

LESSON PLAN 1: WEEK 1 PERIOD 1

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: TYPES OF NUMBERS – WHOLE NUMBERS AND COUNTING NUMBERS

CONTENT:

❖ **Number** – A number is the idea of knowing how many.

❖ **Pattern** – A pattern is repetition of events in a particular order.

❖ **Sequence** – Patterns form a sequence.

❖ **Whole numbers** – Whole numbers are numbers that are not fractions.
• The first whole number is zero (0).
• Examples: 0,1,2,3,4,5,…

❖ **Counting numbers (natural numbers)** – Counting numbers are numbers used to count objects.
• The first counting number is one (1).
• Examples: 1,2,3,4,5,6,…

❖ **Pattern of whole numbers and counting numbers:**
• Ascending order: add 1 each time (+1).
• Descending order: subtract 1 each time (–1).

COMPETENCES (The learner;)

- Defines a number
- Defines a pattern
- Explains that patterns form a sequence
- Distinguishes between whole numbers and counting numbers
- States the first whole number (0)
- States the first counting number (1)
- Gives examples of whole numbers
- Gives examples of counting numbers
- Identifies the pattern of +1 in ascending order
- Identifies the pattern of –1 in descending order

METHODS:

- Question and answer
- Discussion
- Demonstration using number cards
- Guided discovery

LIFE SKILLS / VALUES:

- Logical thinking
- Pattern recognition
- Attention to detail

TEACHING/LEARNING MATERIALS:

- Number cards (0 to 20)
- Chart showing number sequences
- Counting objects (beads, sticks)
- Reference: pp. 92-93

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Leads** a rhyme: "Numbers, numbers, one to ten, count with me and count again! Zero, one, two, three, four, five, let's keep counting to stay alive!" • **Learners respond**: "Six, seven, eight, nine, ten – we can count again and again!" • **Asks**: "What is the first number you say when you count? What is the number that means nothing?"	Rhyme, Question and answer	• Listen to the rhyme • Respond by singing along • Answer: one (1) and zero (0)

15 mins	EXPLORE	• **Displays** number cards 0 to 20 on the board • **Asks**: "Which numbers are used for counting objects?" (1,2,3,…) • **Asks**: "What number comes before 1?" (0) • **Asks**: "What do we call numbers that include zero?" (whole numbers) • **Guides** learners to identify the pattern (+1) when counting forward	Observation, Question and answer, Discovery	• Observe the number cards • Identify counting numbers (1,2,3,…) • Identify zero as a whole number • Notice that each number is one more than the previous
20 mins	EXPLAIN	• **Defines** number: "A number is the idea of knowing how many." • **Defines** pattern: "A pattern is repetition of events in a particular order." • **Explains**: "Patterns form a sequence." • **Defines** whole numbers: "Whole numbers are numbers that are not fractions. The first whole number is zero (0)." • **Defines** counting numbers: "Counting numbers are numbers used to count objects. The first counting number is one (1)." • **Explains** the pattern: "Their sequence has a pattern of +1 in ascending order and –1 in descending order." • **Writes** examples on board: whole numbers {0,1,2,3,4,…}; counting numbers {1,2,3,4,…} • **Instructs** learners to write notes	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat definitions after the teacher • Copy notes into notebooks
10 mins	ELABORATE	• **Re-explains**: "Whole numbers start from zero and go up. Counting numbers start from one. When we count forward, we add 1 each time. When we count backward, we subtract 1 each time." • **Writes** activity on board: 1. What is the first whole number? 2. What is the first counting number? 3. List the first five whole numbers. 4. List the first five counting numbers. 5. What pattern do we use to get the next number in a sequence?	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "What is a whole number? Name the first whole number. What is a counting number? What pattern do we use when counting forward?"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "List the first ten whole numbers and the first ten counting numbers." • **Announces** next lesson: "Sequences of whole numbers."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. What is the first whole number?

2. What is the first counting number?
3. List the first five whole numbers.
4. List the first five counting numbers.
5. What pattern do we use to get the next number in a sequence?

LESSON EVALUATION

Strengths observed: _____

Areas needing improvement: _____

Way forward / Remedial action: _____

Teacher's signature: _____Date: _____

LESSON PLAN 2: WEEK 1 PERIOD 2

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: SEQUENCES OF WHOLE NUMBERS

CONTENT:

❖ **Sequence of whole numbers (ascending)** – Add 1 each time.
• Example: 0,1,2,3,4,5,6,…

❖ **Sequence of whole numbers (descending)** – Subtract 1 each time.
• Example: 10,9,8,7,6,5,…

❖ **Finding missing numbers in whole number sequences:**
• Look at the numbers before and after the blank.
• Use the pattern (add 1 or subtract 1).
• Example: 0,1,2**,,4 → missing number is 3.**
• **Example: 15,14,13,**,11 → missing number is 12.

COMPETENCES (The learner;)

- Identifies the pattern in a sequence of whole numbers
- Completes a given sequence of whole numbers
- Fills in missing numbers in a whole number sequence
- States the rule for ascending order (add 1)
- States the rule for descending order (subtract 1)
- Generates the next term in a whole number sequence

METHODS:

- Question and answer
- Guided practice
- Drill
- Demonstration using number line

LIFE SKILLS / VALUES:

- Logical thinking
- Attention to detail
- Perseverance

TEACHING/LEARNING MATERIALS:

- Number line (0 to 20)
- Flashcards with partial sequences
- Counting beads
- Reference: p. 93

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "What is a whole number? What is the first whole number? What is a counting number?" • **Asks**: "If I say 0,1,2, what comes next? (3) How do you know? (add 1)" • **Tells** learners that today they will learn about sequences of whole numbers.	Question and answer (Review)	• Answer review questions • Identify the next number • Listen to introduction
15 mins	EXPLORE	• **Draws** a number line from 0 to 10 on the board • **Asks**: "What number comes after 5? (6) After 8? (9)" • **Asks**: "What number comes before 5? (4) Before 3? (2)" • **Writes** a sequence: 0,1,2,3,4,___. **Asks**: "What is the missing number? (5)" • **Guides** learners to see that each time we add 1 to get the next number	Observation, Question and answer, Discovery	• Observe the number line • Identify numbers that come after and before • Find missing numbers in sequences • Conclude that whole numbers increase by 1
20 mins	EXPLAIN	• **Explains**: "A sequence of whole numbers in ascending order is formed by adding 1 each time." • **Writes** example: 0,1,2,3,4,5,6,… • **Explains**: "A sequence of whole numbers in descending order is formed by subtracting 1 each time." • **Writes** example: 10,9,8,7,6,… • **Shows** how to fill missing numbers: e.g., 0,1,2,**,4,5 → missing is 3**	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the rule after the teacher • Copy examples into notebooks

		• **Gives more examples: 7,8,9,**,11 → missing is 10; 15,14,13,__,11 → missing is 12 • **Instructs** learners to write notes		
10 mins	ELABORATE	• **Re-explains**: "When numbers go up, we add 1. When numbers go down, we subtract 1. To find a missing number, look at the numbers before and after." • **Writes** activity on board: 1. Complete: 0,1,2,3,4,___ 2. Complete: 10,9,8,7,___ 3. Fill missing: 2,3,**,5,6** **4. Fill missing: 20,19,**,17,16 5. Write the next three whole numbers after 7.	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "Complete: 5,6,7,**,9. Complete: 12,11,10,**,8."	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "Complete the sequences: 0,1,2,**,4; 15,14,13,**,11; 3,4,5,**,7; 8,7,6,**,4." • **Announces** next lesson: "Sequences of counting numbers."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Complete: 0,1,2,3,4,___
2. Complete: 10,9,8,7,___
3. Fill missing: 2,3, __,5,6
4. Fill missing: 20,19, __,17,16
5. Write the next three whole numbers after 7.

LESSON EVALUATION

Strengths observed: _____

Areas needing improvement: _____

Way forward / Remedial action: _____

Teacher's signature: _____Date: _____

LESSON PLAN 3: WEEK 1 PERIOD 3

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: SEQUENCES OF COUNTING NUMBERS

CONTENT:

❖ **Sequence of counting numbers (ascending)** – Add 1 each time, starting from 1.
• Example: 1,2,3,4,5,6,…

❖ **Sequence of counting numbers (descending)** – Subtract 1 each time.
• Example: 10,9,8,7,6,…

❖ **Note** – Counting numbers start from 1, not 0.

❖ **Finding missing numbers in counting number sequences:**
• Use the pattern (add 1 or subtract 1).
• Example: 1,2,3**,,5 → missing is 4.**
• **Example: 9,8,7,**,5 → missing is 6.

COMPETENCES (The learner;)

- Identifies the pattern in a sequence of counting numbers
- Completes a given sequence of counting numbers
- Fills in missing numbers in a counting number sequence
- Distinguishes between whole numbers (include 0) and counting numbers (start at 1)
- States the rule for ascending order (add 1)
- States the rule for descending order (subtract 1)

METHODS:

- Question and answer
- Guided practice
- Drill
- Demonstration using number line

LIFE SKILLS / VALUES:

- Logical thinking
- Attention to detail
- Accuracy

TEACHING/LEARNING MATERIALS:

- Number line (1 to 20)
- Flashcards with partial sequences
- Counting objects (stones, buttons)
- Reference: p. 93

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "Complete: 0,1,2,_,4. What rule do we use?" • **Asks**: "If we start counting from 1 instead of 0, what sequence do we get? (1,2,3,4,…)" • **Tells** learners that today they will learn about sequences of counting numbers.	Question and answer (Review)	• Answer review questions • Recall counting numbers • Listen to introduction
15 mins	EXPLORE	• **Draws** a number line from 1 to 10 on the board (without 0) • **Asks**: "What number comes after 3? (4) After 7? (8)" • **Asks**: "What number comes before 5? (4) Before 2? (1)" • **Writes**: 1,2,3,4,__,6. **Asks**: "What is the missing number? (5)" • **Asks**: "How is this different from whole numbers? (whole numbers include 0, counting numbers start at 1)" • **Guides** learners to see that counting numbers also increase by 1	Observation, Question and answer, Discovery	• Observe the number line • Identify numbers that come after and before • Find missing numbers • Compare with whole numbers
20 mins	EXPLAIN	• **Explains**: "Counting numbers start from 1. They are also called natural numbers." • **Explains**: "A sequence of counting numbers in ascending order is formed by adding 1 each time." • **Writes** example: 1,2,3,4,5,6,… • **Explains**: "A sequence of counting numbers in descending order is formed by subtracting 1 each time." • **Writes** example: 10,9,8,7,6,… • **Shows** how to fill missing numbers: e.g., 1,2,3,**,5 → missing is 4; 9,8,7,**,5 → missing is 6 • **Instructs** learners to write notes	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the rule after the teacher • Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "Counting numbers are like whole numbers but without zero. The rule is the same: add 1 going up, subtract 1 going down." • **Writes** activity on board: 1. Complete: 1,2,3,4,5,___ 2. Complete: 10,9,8,7,___ 3. Fill missing: 3,4,**,6,7** **4. Fill missing: 12,11,**,9,8 5. Write the next three counting numbers after 6.	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "Complete: 5,6,7,**,9. Complete: 15,14,13,**,11. What is the first counting number?"	Oral questioning	• Answer questions orally

5 mins	EXTEND	• **Gives** home assignment: "Complete the sequences: 1,2,3,**,5; 8,7,6,**,4; 4,5,6,**,8; 20,19,18,**,16." • **Announces** next lesson: "Even numbers."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Complete: 1,2,3,4,5,___
2. Complete: 10,9,8,7,___
3. Fill missing: 3,4, __,6,7
4. Fill missing: 12,11, __,9,8
5. Write the next three counting numbers after 6.

LESSON EVALUATION

LESSON PLAN 4: WEEK 1 PERIOD 4

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: EVEN NUMBERS

CONTENT:

❖ **Even numbers** – Even numbers are numbers exactly divisible by 2.
• Examples: 0,2,4,6,8,10,12,14,16,18,20,…

❖ **Pattern of even numbers:**
• Ascending: add 2 each time (+2).
• Descending: subtract 2 each time (–2).

❖ **Digit rule** – Any number that ends with 0,2,4,6, or 8 is an even number.

❖ **Finding missing numbers in even number sequences:**
• Example: 2,4,6,**,10 → missing is 8.**
• **Example: 20,18,16,**,12 → missing is 14.

COMPETENCES (The learner;)

- Defines even numbers as numbers divisible by 2
- Lists examples of even numbers

- States the pattern of even numbers (+2 ascending, –2 descending)
- Completes sequences of even numbers
- Identifies even numbers by their last digit (0,2,4,6,8)
- Generates the next even number in a sequence

METHODS:

- Question and answer
- Guided practice
- Drill
- Demonstration using counters

LIFE SKILLS / VALUES:

- Logical thinking
- Pattern recognition
- Accuracy

TEACHING/LEARNING MATERIALS:

- Counters (beads, buttons) for pairing
- Number chart (0 to 20) with even numbers highlighted
- Flashcards with even numbers
- Reference: pp. 94-95

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "Complete: 1,2,3,__,5. What is the first counting number?" • **Asks**: "If I have 2,4,6, what comes next? (8) What do we call these numbers?" (even numbers) • **Tells** learners that today they will learn about even numbers.	Question and answer (Review)	• Answer review questions • Identify the pattern 2,4,6,8 • Listen to introduction
15 mins	EXPLORE	• **Gives** each pair of learners 10 counters (or uses beads on board) • **Asks**: "Can you put the counters into pairs? How many pairs do you get?" • **Shows** that 2,4,6,8,10 can be paired exactly (no leftover) • **Shows** the number chart with even numbers highlighted (0,2,4,6,8,10,…) • **Asks**: "What do you notice about the last digit of even numbers?" (0,2,4,6,8) • **Guides** learners to see that even numbers increase by 2	Hands-on activity, Observation, Question and answer	• Pair counters • Observe that even numbers can be paired exactly • Identify the pattern (+2) • Note the ending digits
20 mins	EXPLAIN	• **Defines** even numbers: "Even numbers are numbers exactly divisible by 2." • **Lists** examples:	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the rules after the teacher

		0,2,4,6,8,10,12,14,16,18,20,… • **Explains** the pattern: "Even numbers have a pattern of +2 in ascending order and –2 in descending order." • **Shows** sequences: 0,2,4,6,8,10,… (add 2); 20,18,16,14,… (subtract 2) • **Explains** the digit rule: "Any number that ends with 0,2,4,6, or 8 is an even number." • **Shows** how to find missing numbers: 2,4,6, _ ,10 → missing is 8 • **Instructs** learners to write notes		• Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "Even numbers can be divided by 2 without a remainder. They end with 0,2,4,6, or 8. The sequence goes up by 2." • **Writes** activity on board: 1. Complete: 0,2,4,6,8, __ 2. Complete: 20,18,16,14,__ 3. Fill missing: 4,6,**,10,12** **4. Fill missing: 14,12,**,8,6 5. Write the next three even numbers after 10.	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "What is an even number? Give one example. What is the pattern for even numbers? What digit does an even number end with?"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "List all even numbers from 0 to 20. Complete: 6,8,**,12,14; 18,16,**,12,10." • **Announces** next lesson: "Odd numbers."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Complete: 0,2,4,6,8, __
2. Complete: 20,18,16,14, __
3. Fill missing: 4,6, __,10,12
4. Fill missing: 14,12, __,8,6
5. Write the next three even numbers after 10.

Teacher's signature: _____Date: _____

LESSON PLAN 5: WEEK 1 PERIOD 5

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: ODD NUMBERS

CONTENT:

❖ **Odd numbers** – Odd numbers are numbers not exactly divisible by 2.
• Examples: 1,3,5,7,9,11,13,15,17,19,…

❖ **Pattern of odd numbers:**
• Ascending: add 2 each time (+2).
• Descending: subtract 2 each time (–2).

❖ **Digit rule** – Any number that ends with 1,3,5,7, or 9 is an odd number.

❖ **Finding missing numbers in odd number sequences:**
• Example: 3,5,7,**,11 → missing is 9.**
• **Example: 19,17,15,**,11 → missing is 13.

COMPETENCES (The learner;)

- Defines odd numbers as numbers not divisible by 2
- Lists examples of odd numbers
- States the pattern of odd numbers (+2 ascending, –2 descending)
- Completes sequences of odd numbers
- Identifies odd numbers by their last digit (1,3,5,7,9)
- Generates the next odd number in a sequence
- Distinguishes between even and odd numbers

METHODS:

- Question and answer
- Guided practice
- Drill
- Demonstration using counters

LIFE SKILLS / VALUES:

- Logical thinking
- Pattern recognition
- Accuracy

TEACHING/LEARNING MATERIALS:

- Counters (beads, buttons) for pairing
- Number chart (0 to 20) with odd numbers highlighted
- Flashcards with odd numbers
- Reference: pp. 94-95

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "What is an even number? Give one example. Complete: 2,4,6,_,10." • **Asks**: "If I have 1,3,5, what comes next? (7) What do we call these numbers?" (odd numbers) • **Tells** learners that today they will learn about odd numbers.	Question and answer (Review)	• Answer review questions • Identify the pattern 1,3,5,7 • Listen to introduction
15 mins	EXPLORE	• **Gives** each pair of learners 5 counters (or uses beads on board) • **Asks**: "Can you put 5 counters into pairs?" (2 pairs + 1 leftover) • **Shows** that 1,3,5,7,9 cannot be paired exactly (one leftover) • **Shows** the number chart with odd numbers highlighted (1,3,5,7,9,11,…) • **Asks**: "What do you notice about the last digit of odd numbers?" (1,3,5,7,9) • **Guides** learners to see that odd numbers also increase by 2	Hands-on activity, Observation, Question and answer	• Pair counters • Observe that odd numbers leave one leftover when paired • Identify the pattern (+2) • Note the ending digits
20 mins	EXPLAIN	• **Defines** odd numbers: "Odd numbers are numbers not exactly divisible by 2." • **Lists** examples: 1,3,5,7,9,11,13,15,17,19,… • **Explains** the pattern: "Odd numbers have a pattern of +2 in ascending order and –2 in descending order." • **Shows** sequences: 1,3,5,7,9,11,… (add 2); 21,19,17,15,… (subtract 2) • **Explains** the digit rule: "Any number that ends with 1,3,5,7, or 9 is an odd number." • **Shows** how to find missing numbers: 3,5,7, _,11 → missing is 9 • **Instructs** learners to write notes	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the rules after the teacher • Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "Odd numbers cannot be divided by 2 exactly. They end with 1,3,5,7, or 9. The sequence goes up by 2 just like even numbers." • **Compares** even and odd numbers: even end with 0,2,4,6,8; odd end with 1,3,5,7,9 • **Writes** activity on board: 1. Complete: 1,3,5,7,9,___	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books

		2. Complete: 19,17,15,13,__ 3. Fill missing: 5,7,**,11,13** **4. Fill missing: 15,13,**,9,7 5. Write the next three odd numbers after 11.		
5 mins	EVALUATE	• **Quick quiz**: "What is an odd number? Give one example. What is the pattern for odd numbers? What digit does an odd number end with? Is 10 even or odd?"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "List all odd numbers from 1 to 21. Complete: 7,9,**,13,15; 21,19,**,15,13." • **Announces** next lesson (Week 2 Period 1): "Finding missing numbers – addition pattern."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Complete: 1,3,5,7,9,__
2. Complete: 19,17,15,13, __
3. Fill missing: 5,7, __,11,13
4. Fill missing: 15,13, __,9,7
5. Write the next three odd numbers after 11.

LESSON EVALUATION

Teacher's signature: _____Date: _____

LESSON PLAN 6: WEEK 2 PERIOD 1

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: FINDING MISSING NUMBERS – ADDITION PATTERN

CONTENT:

❖ **Addition pattern** – Identify the rule by finding the difference between consecutive terms. If the difference is the same, add that constant each time.

❖ **Finding the rule:**

• Subtract the first term from the second term to find the amount added.

• Example: 1,4,7,10,… → 4–1 = 3, so add 3 each time.

❖ **Finding missing numbers:**

• Apply the rule to find the next term or fill in missing terms.

• Example: 1,4,7,10,___→ next is 13.

❖ **Examples:**

• 2,5,8,11,___→ add 3 → 14.

• 3,6,9,12,___→ add 3 → 15.

• 5,9,13,17,___→ add 4 → 21.

COMPETENCES (The learner;)

- Identifies the addition rule in a sequence
- Finds the constant difference between consecutive terms
- Determines the next term in an addition pattern sequence
- Fills in missing numbers in sequences with addition pattern
- Extends a given sequence by applying the addition rule

METHODS:

- Question and answer
- Guided practice
- Drill
- Demonstration

LIFE SKILLS / VALUES:

- Logical thinking
- Pattern recognition
- Accuracy

TEACHING/LEARNING MATERIALS:

- Number line
- Flashcards with addition pattern sequences
- Reference: pp. 95-96

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson (Week 1 Period 5): "What is an odd number? Give one example. What digit does an odd number end with? Is 10 even or odd?" • **Writes** sequence: 2,4,6,8,__. **Asks**: "What comes next? (10) What are we adding each time? (2)" • **Tells** learners that today they will learn to find	Question and answer (Review)	• Answer review questions • Identify the addition pattern • Listen to introduction

		missing numbers in sequences using addition patterns.		
15 mins	EXPLORE	• **Writes** on board: 1,4,7,10,. • **Asks: "What is the difference between 4 and 1? (3) Between 7 and 4? (3) Between 10 and 7? (3)"** • **Asks: "What rule do we use? (add 3) What is the next number? (13)"** • **Writes another: 5,9,13,17,.** • **Asks**: "What is the difference? (4) What is the next number? (21)" • **Guides** learners to find the constant difference and apply it.	Observation, Question and answer, Discovery	• Find the difference between terms • State the rule (add a constant) • Find the next number • Conclude that addition patterns have a constant difference
20 mins	EXPLAIN	• **Explains**: "In an addition pattern sequence, the difference between any two consecutive terms is the same. To find the rule, subtract the first term from the second. Then add that number to the last term to get the next term." • **Works through** examples on the board: - 3,6,9,12,___→ difference 3 → next 15. - 2,5,8,11,14,___→ difference 3 → next 17. - 10,15,20,25,___→ difference 5 → next 30. • **Shows** how to fill missing numbers in the middle: e.g., 4,__,10,13,16. The difference is 3, so missing is 7. • **Instructs** learners to write notes and examples.	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the method after the teacher • Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "Always find the difference between two terms. If it is the same, add that number to get the next term." • **Writes** activity on board: 1. Find the next number: 2,5,8,11, __ 2. Find the next number: 6,10,14,18, __ 3. Fill missing: 3,7,**,15,19** **4. Fill missing: 1,6,11,**,21 5. Complete: 4,9,14, _ ,24	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "Find the next number: 5,10,15,20,___(25). Fill missing: 2,5,8, _ ,14 (11)"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "Find the next three terms: (a) 3,7,11,15,____(b) 10,20,30,40,___(c) 4,9,14,19,**. Fill missing: 1,**,9,13,17." • **Announces** next lesson: "Finding missing numbers – subtraction pattern."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Find the next number: 2,5,8,11, __
2. Find the next number: 6,10,14,18, __
3. Fill missing: 3,7, __,15,19
4. Fill missing: 1,6,11, __ ,21
5. Complete: 4,9,14, _ ,24

LESSON EVALUATION

Strengths observed: _____

Areas needing improvement: _____

Way forward / Remedial action: _____

Teacher's signature: _____Date: _____

LESSON PLAN 7: WEEK 2 PERIOD 2

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: FINDING MISSING NUMBERS – SUBTRACTION PATTERN

CONTENT:

❖ **Subtraction pattern** – Identify the rule by finding the difference between consecutive terms. If the difference is negative (decreasing), subtract that constant each time.

❖ **Finding the rule:**
• Subtract the second term from the first term to find the amount subtracted.
• Example: 65,55,50,45,… → 65–55 = 10, but then 55–50 = 5 – not constant. Better example: 50,45,40,35,… → subtract 5 each time.

❖ **Finding missing numbers:**
• Apply the rule (subtract the same number) to find the next term or fill in missing terms.
• Example: 40,35,30,__ → subtract 5 → 25.

❖ **Examples:**
• 20,16,12,8,__ → subtract 4 → 4.
• 30,25,20,15,__ → subtract 5 → 10.
• 100,90,80,70,__ → subtract 10 → 60.

COMPETENCES (The learner;)

- Identifies the subtraction rule in a descending sequence
- Finds the constant difference (subtracted amount)
- Determines the next term in a subtraction pattern sequence
- Fills in missing numbers in sequences with subtraction pattern
- Extends a given sequence by applying the subtraction rule

METHODS:

- Question and answer
- Guided practice
- Drill

- Demonstration

LIFE SKILLS / VALUES:

- Logical thinking
- Pattern recognition
- Accuracy

TEACHING/LEARNING MATERIALS:

- Number line
- Flashcards with subtraction pattern sequences
- Reference: pp. 95-96

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "Find the next number: 2,5,8,11,___(14). Fill missing: 3,7,**,15,19 (11)."** • **Writes sequence: 20,18,16,14,. Asks**: "What comes next? (12) What are we subtracting each time? (2)" • **Tells** learners that today they will learn to find missing numbers in sequences using subtraction patterns.	Question and answer (Review)	• Answer review questions • Identify the subtraction pattern • Listen to introduction
15 mins	EXPLORE	• **Writes** on board: 30,25,20,15,. • **Asks: "What is the difference between 30 and 25? (5) Between 25 and 20? (5) Between 20 and 15? (5)"** • **Asks: "What rule do we use? (subtract 5) What is the next number? (10)"** • **Writes another: 50,45,40,35,.** • **Asks**: "What is the difference? (5) What is the next number? (30)" • **Guides** learners to find the constant difference and apply it.	Observation, Question and answer, Discovery	• Find the difference between terms • State the rule (subtract a constant) • Find the next number • Conclude that subtraction patterns have a constant difference
20 mins	EXPLAIN	• **Explains**: "In a subtraction pattern sequence, the numbers go down by the same amount each time. To find the rule, subtract the second term from the first. Then subtract that number from the last term to get the next term." • **Works through** examples on the board: - 40,35,30,25,___→ subtract 5 → next 20. - 25,20,15,10,___→ subtract 5 → next 5. - 100,90,80,70,___→ subtract 10 → next 60. • **Shows** how to fill missing numbers in the middle: e.g., 50,45,_,35,30. The difference is 5, so missing is 40. • **Instructs** learners to write notes and examples.	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the method after the teacher • Copy examples into notebooks

10 mins	ELABORATE	• **Re-explains**: "Always find the difference by subtracting a term from the previous term. If it is the same, subtract that number to get the next term." • **Writes** activity on board: 1. Find the next number: 40,36,32,28,____ 2. Find the next number: 60,55,50,45,____ 3. Fill missing: 100,90,**,70,60** **4. Fill missing: 35,30,25,**,15 5. Complete: 80,75,70, _ ,60	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "Find the next number: 50,45,40,35,__(30). Fill missing: 25,20, __,10,5 (15)"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "Find the next three terms: (a) 90,85,80,75,____(b) 48,44,40,36,__ (c) 70,65,60,55,**. Fill missing: 60,55,**,45,40." • **Announces** next lesson: "Finding missing numbers – mixed patterns."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Find the next number: 40,36,32,28,____
2. Find the next number: 60,55,50,45,____
3. Fill missing: 100,90, _ ,70,60
4. Fill missing: 35,30,25, __ ,15
5. Complete: 80,75,70, _ ,60

Way forward / Remedial action: _____

Teacher's signature: _____Date: _____

LESSON PLAN 8: WEEK 2 PERIOD 3

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: FINDING MISSING NUMBERS – MIXED PATTERNS

CONTENT:

❖ **Mixed patterns** – Sequences may involve multiplication, division, or a combination of operations.

❖ **Identifying the rule:**

• Look at the relationship between consecutive terms.

• It could be multiplication (e.g., ×2, ×3) or division (e.g., ÷2, ÷3) or a combination.

❖ **Examples:**

• 2,4,8,16,___→ multiply by 2 → next 32.

• 81,27,9,3,___→ divide by 3 → next 1.

• 1,3,9,27,___→ multiply by 3 → next 81.

• 100,50,25,___→ divide by 2 → next 12.5 (may be whole numbers? Use example: 64,32,16,8,____→ divide by 2 → 4).

❖ **Note:** For P3, focus on simple multiplication and division patterns with whole numbers.

COMPETENCES (The learner;)

- Identifies multiplication patterns in sequences
- Identifies division patterns in sequences
- Determines the rule (multiply or divide by a constant)
- Finds the next term in mixed pattern sequences
- Fills in missing numbers in sequences with multiplication or division

METHODS:

- Question and answer
- Guided practice
- Drill

LIFE SKILLS / VALUES:

- Logical reasoning
- Pattern recognition
- Critical thinking

TEACHING/LEARNING MATERIALS:

- Flashcards with mixed pattern sequences
- Multiplication table chart
- Reference: pp. 95-96

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "Find the next number: 40,36,32,28,__(24). Fill missing: 35,30,25,**,15 (20)."** • **Writes sequence: 2,4,8,16,. Asks**: "What comes next? (32) What operation do we use? (multiply by 2)" • **Tells** learners that today they will learn to find	Question and answer (Review)	• Answer review questions • Identify the multiplication pattern • Listen to introduction

		missing numbers in mixed patterns (multiplication and division).		
15 mins	EXPLORE	• **Writes** on board: 3,6,12,24,. • **Asks: "What is 3×2? (6) 6×2? (12) 12×2? (24) So what is the rule? (multiply by 2) Next term? (48)"** • **Writes another: 64,32,16,8,.** • **Asks**: "What is 64÷2? (32) 32÷2? (16) 16÷2? (8) So rule? (divide by 2) Next term? (4)" • **Guides** learners to identify multiplication and division patterns.	Observation, Question and answer, Discovery	• Find the relationship between terms • State the rule (multiply or divide) • Find the next term • Conclude that patterns can use multiplication or division
20 mins	EXPLAIN	• **Explains**: "Some sequences use multiplication or division instead of addition or subtraction. To find the rule, divide the second term by the first term. If the result is the same for each step, that is the multiplier." • **Works through** examples on the board: - 2,6,18,54,___→ multiply by 3 → next 162. - 100,50,25,___→ divide by 2 → next 12.5 (use whole numbers: 80,40,20,10,___→ divide by 2 → 5) - 1,5,25,125,___→ multiply by 5 → next 625. • **Shows** how to fill missing numbers in the middle: e.g., 5,10,_,40,80. The rule is multiply by 2, so missing is 20. • **Instructs** learners to write notes and examples.	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the method after the teacher • Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "For multiplication patterns, multiply by the same number each time. For division patterns, divide by the same number each time." • **Writes** activity on board: 1. Find the next number: 2,4,8,16,____ 2. Find the next number: 81,27,9,3,____ 3. Find the next number: 5,10,20,40,____ 4. Fill missing: 3,9,**,81,243** **5. Fill missing: 200,100,**,25,12.5 (use whole: 64,32,16,__,4) → 8	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "Find the next number: 2,6,18,54,_(162). Find the next number: 100,50,25,12.5,_(6.25) – if using whole: 48,24,12,6,__(3)"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "Find the next three terms: (a) 3,9,27,81,____(b) 128,64,32,16,__(c) 4,8,16,32,**. Fill missing: 6,18,**,162,486." • **Announces** next lesson: "Multiples of numbers (less than, between)."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. Find the next number: 2,4,8,16,____
2. Find the next number: 81,27,9,3,____
3. Find the next number: 5,10,20,40,____

Teacher's signature: _____Date: _____

LESSON PLAN 9: WEEK 2 PERIOD 4

DATE: _____| **CLASS:** Primary Three | **NO. OF LEARNERS:** _____| **SUBJECT:** MATHEMATICS | **TIME:** 60 Minutes

TOPIC: NUMBER PATTERNS AND SEQUENCE

SUB TOPIC: MULTIPLES OF NUMBERS (LESS THAN, BETWEEN)

CONTENT:

❖ **Multiple** – A multiple is the product of a given number and any whole number.

❖ **Key words:** less than, between, up to, from.

❖ **Listing multiples less than a given value:**
• Multiply the number by 1,2,3,… until the product is less than the given value.
• Example: multiples of 2 less than 10 → 2,4,6,8.

❖ **Listing multiples between two values:**
• Start from the smallest multiple greater than or equal to the lower value, up to the largest multiple less than or equal to the upper value.
• Example: multiples of 8 between 7 and 42 → 8,16,24,32,40.

❖ **Finding the first few multiples:**
• Example: first 5 multiples of 4 → 4,8,12,16,20.

COMPETENCES (The learner;)

- Defines a multiple
- Lists multiples of a number less than a given value
- Lists multiples of a number between two given values
- Lists the first few multiples of a number
- Uses multiplication to generate multiples
- Identifies the 3rd, 4th, etc., multiple of a number

METHODS:

- Question and answer
- Guided practice
- Drill
- Multiplication table

LIFE SKILLS / VALUES:

- Systematic thinking
- Multiplication skills
- Accuracy

TEACHING/LEARNING MATERIALS:

- Multiplication table chart
- Flashcards with multiple problems
- Reference: pp. 96-97

LESSON DEVELOPMENT (5Es MODEL)

TIME	STAGE	TEACHER'S ACTIVITY	METHODS/TECHNIQUES	LEARNERS' ACTIVITY
5 mins	ENGAGE	• **Reviews** previous lesson: "Find the next number: 2,4,8,16,___(32). Fill missing: 64,32,16,__,4 (8)." • **Asks**: "What are the numbers you get when you multiply 2 by 1,2,3,4? (2,4,6,8) These are called multiples of 2." • **Tells** learners that today they will learn about multiples of numbers.	Question and answer (Review)	• Answer review questions • Identify multiples of 2 • Listen to introduction
15 mins	EXPLORE	• **Writes** on board: "Multiples of 3 less than 15." • **Asks**: "3×1=3, 3×2=6, 3×3=9, 3×4=12, 3×5=15 (not less than 15). So the multiples are 3,6,9,12." • **Writes** another: "Multiples of 5 between 10 and 30." • **Asks**: "5×2=10, 5×3=15, 5×4=20, 5×5=25, 5×6=30. So between 10 and 30 (excluding 10 and 30?) Usually inclusive? Use: between 10 and 30 means >10 and <30? The book says "between" often includes lower and upper? Clarify: "multiples of 8 between 7 and 42" gave 8,16,24,32,40 (included 8 but not 42). So we include lower multiple if it's ≥ lower bound and < upper bound. Use simple: "between 10 and 30" should include 10? Usually "between" can mean inclusive. Use: multiples of 5 from 10 to 30 → 10,15,20,25,30. But the example says "between 7 and 42" gave 8,16,24,32,40 (not including 42). So we exclude the upper bound. For P3, keep simple: "less than" and "from … to". We'll use "from … to" for inclusive both ends. • **Instead**, use examples from the breakdown: "List multiples of 2 less than 10" → {2,4,6,8}. "List	Question and answer, Guided discovery	• Multiply the number by 1,2,3,… • List multiples that satisfy the condition • Conclude that multiples are products of a number and whole numbers

		multiples of 3 from 3 to 15" → {3,6,9,12,15}. • **Guides** learners to generate multiples by multiplication.		
20 mins	EXPLAIN	• **Defines** multiple: "A multiple is a product of two or more numbers." • **Explains**: "To list multiples of a number less than a given value, multiply the number by 1,2,3,… until the product is less than that value." • **Explains**: "To list multiples between two values, multiply the number by 1,2,3,… and choose those that fall between the given numbers." • **Works through** examples: - Multiples of 4 less than 20: 4,8,12,16. - Multiples of 6 from 6 to 30: 6,12,18,24,30. - First 5 multiples of 7: 7,14,21,28,35. • **Shows** how to find the 4th multiple of 3: 3×4=12. • **Instructs** learners to write notes.	Direct instruction, Explanation, Note-taking	• Listen attentively • Repeat the method after the teacher • Copy examples into notebooks
10 mins	ELABORATE	• **Re-explains**: "To find multiples, multiply the number by 1, then 2, then 3, and so on. Stop when you reach the limit." • **Writes** activity on board: 1. List multiples of 3 less than 15. 2. List multiples of 5 from 5 to 25. 3. List the first 4 multiples of 6. 4. List multiples of 4 between 10 and 30. 5. What is the 5th multiple of 2?	Direct elaboration, Board activity	• Listen to re-explanation • Copy activity from board • Complete activity in books
5 mins	EVALUATE	• **Quick quiz**: "List multiples of 2 less than 10. (2,4,6,8) List first 3 multiples of 5. (5,10,15) What is the 4th multiple of 3? (12)"	Oral questioning	• Answer questions orally
5 mins	EXTEND	• **Gives** home assignment: "List: (a) multiples of 4 less than 20 (b) multiples of 7 from 7 to 35 (c) first 5 multiples of 8 (d) multiples of 3 between 10 and 20." • **Announces** next lesson: "Multiples of numbers (from … to)."	Home assignment, Topic preview	• Note assignment • Listen to next topic

ACTIVITY

1. List multiples of 3 less than 15.
2. List multiples of 5 from 5 to 25.
3. List the first 4 multiples of 6.
4. List multiples of 4 between 10 and 30.
5. What is the 5th multiple of 2?
